

Superior yields . . . season after season.

TAM 113

The all new TAM 113 seed variety is a hard red winter wheat variety with excellent adaptation to the High Plains and Southern Plains. It features superior disease resistance in a broad region that stretches from Texas to South Dakota. The variety is resistant to the prevalent races of leaf and stripe rust. The variety has forage potential and can be used in a dual-purpose (grazing plus grain) system.

Characteristics

Plant Height	Medium
Maturity	Medium
Coleoptile Length	Medium Long
Seed Size	Small
Straw Strength	Very Good
Test Weight	Good
Winterhardiness	Good
Milling & Baking Quality	Acceptable
Yield Potential	Excellent
Grazing Potential	Excellent

Disease & Insects

Barley Yellow Dwarf	N/A
Hessian Fly	Susceptible
Powdery Mildew	Mod. Suceptible
Leaf Rust	Resistant
Septoria Leaf Blotch	N/A
Spindle Streak Mosaic	Susceptible
Soil Borne Mosaic	Susceptible
Stripe Rust	Resistant
Tan Spot	N/A
Wheat Streak Mosaic	N/A

PVPA Status: Protected, must be sold only as a class of certified seed
