

# TRIPLE TREAT SORGHUM SUDANGRASS

**JOHNSTON**<sup>TM</sup>  
EST. *Seed Co* 1893

## DESCRIPTION

Triple Treat is a three-way cross sorghum sudangrass hybrid that grows extremely fast and delivers exceptional regrowth. Triple Treat is an excellent variety for grazing and baling that grows 6 to 10 feet in height with tremendous tonnage potential. Feeding value will vary with stage of maturity. Protein is highest in the earlier stages of growth with tonnage higher in the latter stages.

## KEY CHARACTERISTICS

- Excellent growth and fast regrowth
- Excellent for haying and grazing
- Continuous summer long grazing
- Tremendous tonnage potential

## MANAGEMENT TIPS

- Never allow to head quality deteriorates rapidly mow or green chop and utilize regrowth
- TDN content depends on maturity, fertility, and moisture
- Quicker drying and improved quality when crimped or conditioned
- Protein highest in earlier stages of growth with tonnages higher in latter states
- Can also be used for green chop, ensilage, green manure, or cover crop!

## ESTABLISHMENT & MANAGEMENT

### GRAZING:

- Planting Rate: 25-35 lbs per acre
- Planting Depth: 1 1/2" - 2"
- Min. Soil Temp: 60 degrees
- Cross fence and rotate stock for maximum carrying capacity
- Start grazing when plants are knee high
- Apply 40 -60 lbs. of nitrogen between grazing for maximum regrowth (Soil tests may indicate the need for additional nutrients)

## ESTABLISHMENT & MANAGEMENT

### HAYING & BALING:

- Planting Rate: 30 + lbs per acre - Higher rates improve quality and tonnage (smaller stems, faster curing and baling, higher leaf to stem ratio, and increased palatability)
- Planting Depth: 1 1/2" - 2"
- Min. Soil Temp: 60 degrees
- For maximum TDN – cut at 4 feet high
- For maximum tonnage –cut at boot stage
- Leave 8-10 inches stubble for faster regrowth
- Apply 50 lbs. of nitrogen initially and between cuttings (Soil tests may indicate the need for additional nutrients)

## SINCE 1893, JOHNSTON SEED COMPANY HAS BEEN “PLANTING” SEEDS OF SUCCESS...

It was over 125 years ago when Willis B. Johnston began selling seeds, feed, and coal to the early day settlers. Little did W.B. know that it was the beginning of something special. Today, the focus is specialty seeds, not sold just locally, but marketed on six different continents around the world. Johnston Seed continues to sell seed of all traditional crops like wheat, rye, corn, sorghum, and soybeans, but producing and marketing specialty seeds like proprietary bermudagrasses, buffalograss, wildflowers, native grasses, wildlife seeds, and cover crops are now the focus of Johnston Seed. One thing has not changed since 1893, and that is service. W.B. instilled a work ethic and a desire to provide the best seed for his customers. The management and employees of Johnston Seed have continued this tradition with great service and products, and we want to be your “seed” for success.
